

Post-doctoral studies – position focused on synthetic work University Hospital Hradec Králové, Czech Republic

Position description: University Hospital Hradec Králové, Biomedical Research Center (BRC), is looking for new PhD graduates with orientation on organic and pharmaceutical chemistry. We are searching for unique person with broad scientific and management background in the process of development new drugs (synthesis of new drug candidates with regard to Alzheimer disease, and other drugs). Candidate will become the part of active scientific group and will be positioned as leader in solving projects aimed at biomedicine. With other team members and students he/she will be able to participate in development of novel drugs.

This skilled scientist will play significant role in providing financial support from new projects for CBR and also high quality research outcomes are expected. The candidate must have finished PhD study from organic chemistry, pharmaceutical chemistry or other related subjects. Job description involves synthesis of novel drug candidates, evaluation of their physic-chemical properties and evaluation of their interactions with biological systems. The position also covers educational activity and responsibility for leading both pre-gradual and postdoctoral students. Excellent interpersonal skills, willingness and educational abilities are necessary for cooperation in multidisciplinary team.
