### **Aims and scope**

Journal of Applied Biomedicine promotes translation of basic biomedical research into clinical investigation, conversion of clinical evidence into practice in all medical fields, and publication of new ideas for conquering human health problems across disciplines. Providing a unique perspective, this international journal publishes peer-reviewed original papers and reviews offering a sensible transfer of basic research to applied clinical medicine. Journal of Applied Biomedicine covers the latest developments in various fields of biomedicine with special attention to cardiology and cardiovascular diseases, genetics, immunology, environmental health, toxicology, neurology and oncology as well as multidisciplinary studies. The views of experts on current advances in nanotechnology and molecular/cell biology will be also considered for publication as long as they have a direct clinical impact on human health. The journal does not accept basic science research or research without significant clinical implications. Manuscripts with innovative ideas and approaches that bridge different fields and show clear perspectives for clinical applications are considered with top priority.

Journal of Applied Biomedicine is the official journal of the Faculty of Health and Social Sciences of the University of South Bohemia in Ceske Budejovice, Czech Republic. Please see our Guide for Authors for information on article submission.

### **Benefits to authors**

- open-access
- fast double-blind evaluation of manuscript by independent international experts;
- fast on-line publication of accepted manuscripts.

### **Guide for Authors:**

- All articles are subject to double blind peer review
- Disclosure of any actual or potential conflict of interest (any financial, personal or other relationships with other people or organizations), ethics and funding should be provided
- Upon submission of an article, authors are asked to sign the Publishing agreement
- Submission of an article implies that the work described has not been published previously that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically
- A statement that all authors have approved the final article should be true and included in the disclosure (authors are obliged to provide details about authors' contribution)

Authors are requested to submit their manuscripts at <http://jab.zsf.jcu.cz>

### **Submission checklist**

Ensure that the following items are present:

*One author has been designated as the corresponding author with contact details*

- E-mail address; Full postal address; Phone numbers

*All necessary files have been uploaded, and contain*

- Keywords; Highlights; All figure captions; All tables (including title, description, footnotes)

*Further considerations*

- Manuscript has been 'spell-checked' and 'grammar-checked'
- References are in the correct format for this journal
- All references mentioned in the Reference list are cited in the text, and vice versa
- Permission has been obtained for use of copyrighted material from other sources (including the Web)
- Color figures are clearly marked as being intended for color reproduction on the Web (free of charge) and in print, or to be reproduced in color on the Web (free of charge) and in black-and-white in print
- If only color on the Web is required, black-and-white versions of the figures are also supplied for printing purposes

### **Language (usage and editing services)**

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use some English Language Editing service.
